

Building Decarbonisation Action Plan: Advancing integrated decarbonisation of Europe's buildings

The Building Decarbonisation Action Plan is composed of six complementary actions aimed at advancing integrated decarbonisation approaches in buildings at the local level. The six actions cover important topics in order to ensure a more effective implementation of building decarbonisation approached at the local level. Therefore, these Actions look at regulatory interplays and links between different plans at the local level, data and indicators on energy and buildings, funding and financing options, as well as, ensuring effective governance models for building decarbonisation at the local level.
